

Research indicates that school climate can either be a positive influence on students' learning environment, or can serve as a significant barrier to students' learning. Researchers have documented that positive ratings of student climate to contribute to factors that help high economically disadvantaged schools "beat the odds" (Voight, Austin & Hanson, 2013). Indeed, students at high-performing AISD schools with high levels of economic disadvantage had more positive ratings of behavioral environment and adult fairness and respect in Spring 2013 than did students at lower performing schools AISD with similar levels of economic disadvantage (Lamb, 2014).

The following tables show the total number of surveys students at Baldwin completed in 2013-2014 (Table 1) and the response rate by grade (Table 2).

# of surveys returned	308	16,960
# of students	336	19,770
% of students represented	92%	86%

grade	# of students enrolled	# of responses	response rate
3rd grade	125	116	93%
4th grade	102	94	92%
5th grade	109	93	85%
6th grade	n/a	1	n/a%

Students' grade level was self-reported. Population data reflect enrollment as of the PEIMS snapshot date in October 2012.

These items are based on the subscale from the Tripod survey and response options have changed to be on the AISD scale. It is desirable to have a response of at least 3.0. One item was dropped from this subscale in 2014 and items #12 and #20 have been moved from the Adult Fairness and Respect subscale to the Teacher Expectations subscale based on results generated from factor analyses and reliability analyses. Average subscale scores reported here are different than those reported in prior reports.
