**AUSTIN INDEPENDENT SCHOOL DISTRICT  
STAFF CLIMATE SURVEY RESULTS 2008-2009**

Survey Report

**BLAZIER ELEMENTARY**

A healthy school climate is characterized by positive relationships among students, all campus staff, and the community. School climate is a key factor in several important outcomes including student achievement, reduced violence, higher morale, and faculty trust (Hoy, Smith, & Sweetland, 2002). More specifically, research in AISD indicates that staff climate survey results are related to student Texas Assessment of Knowledge and Skills (TAKS) performance in both math and reading (Bush-Richards, Cornetto, & Schmitt, 2008; Schmitt, 2006).

The AISD Staff Climate Survey was developed from the research-based Organizational Climate Inventory (OCI), which measures several dimensions of school climate (Hoy et al., 2002) including *Collegial Leadership*, *Professional Teacher Behavior*, and *Achievement Press*. In addition to these items from the OCI, the 2008-2009 AISD Staff Climate Survey included items developed by researchers to measure *Community Engagement* (Tschannen-Moran, Parish, & DiPaola, 2006); climate items designed for relevance to all campus staff; school safety items; and items measuring the implementation of Positive Behavior Support (PBS) on campus. Related items were grouped together in *subscales*, and the average across subscale items was computed as a *subscale score*.

In Fall 2008, 4,216 elementary school staff responded to the survey, representing approximately 77% of elementary campus staff. Table 1 provides a summary of respondents from Blazier by position type for the past 3 years.

## RESULTS FOR BLAZIER ELEMENTARY

Survey results for Blazier for the past 3 years are summarized here. To indicate which changes are most meaningful from year to year, statistically significant changes are flagged with up or down arrows (↑ ↓).<sup>10</sup> To help put results in context, 2008-2009 results also are provided for all AISD elementary campus staff. Table 2 provides an overview of the results for Blazier by subscale for the past 3 years.

Campuses with higher Overall Climate scores are characterized by more positive relationships among administrators, staff, teachers, and students. If Blazier’s Overall Climate score was over 3.0, the staff viewed the school environment positively. If Blazier’s Overall Climate score was below 2.5, the campus did not have a positive school climate. Scores between 2.5 and 3.0 indicate a fair school climate. School Climate and Behavior Management subscale scores can be interpreted in a similar fashion (i.e., it is desirable to have scores at 3.0 or above). Blazier’s PBS score represents the average percentage of respondents who indicated *yes* when asked about PBS-related knowledge and behaviors.

*Note:* Changes were made to the items included in the computation of Overall Climate, PBS, and Safety for 2008-2009.

In the tables that follow, please review the individual items that make up each subscale with particular attention to how Blazier’s averages changed or remained consistent over time. Please share the results of this report with all campus staff and Campus Advisory Council to inform campus improvement planning.

<sup>10</sup> Effect sizes (Cohen’s d) were calculated for changes from 2006-2007 to 2007-2008 and 2007-08 to 2008-09. Effect sizes are a measure of the magnitude of the difference between two means. Mean differences were flagged as meaningful where d ≥ .18.

**Collegial Leadership.** Collegial Leadership involves treating teachers and staff as professional colleagues, and with openness, egalitarianism, and friendliness, but at the same time setting clear expectations and standards for performance. This subscale consisted of 7 items that addressed the degree to which the principal met the social needs of the faculty and worked toward achieving the goals of the school. The individual item and average subscale scores for Blazier and for all elementary schools are shown in Table 4.

**Professional Teacher Behavior.** This subscale consisted of 8 items that addressed the degree to which respondents indicated respect for colleagues' competence, commitment to

**Achievement Press.** Achievement press is marked by students who persist, strive to achieve, and are respected by each other and teachers for their academic successes. This subscale consisted of 8 items that described the extent to which Blazier has set high but achievable academic standards and goals. In addition, this subscale measured the extent to which parents, teachers, and principals exert pressure for high standards and school improvement. The individual item and average subscale scores for Blazier and for all elementary schools are shown in Table 6.

**SCHOOL SAFETY, BEHAVIOR MANAGEMENT, AND POSITIVE BEHAVIOR SUPPORT**

The next section of the survey addressed the safety of the school environment for students and staff, including the prevalence of undesirable student behavior on campus, staff satisfaction with how student behavior was managed on each campus, and staff familiarity with issues related to PBS.

**Undesirable Student Behaviors.** These items measured staff reports about the frequency of selected undesirable student behaviors on campus. The items were rated on a scale of 0 (*never happens*) to 4 (*happens daily*). The individual item and average subscale scores for Blazier and for all elementary schools are shown in Table 8. Items with *high* average responses (above 2.0) should be prioritized for improvement.

**PBS.** These items were new to the survey in 2008-2009 and addressed staff knowledge and behaviors related to PBS. Response options included *yes*, *no*, *don't know*, and *N/A*. For each item, the percentage of staff who answered *yes* and *no* are provided in Table 10, along with the average percentage of *yes* and *no* responses across the 4 items.
