

Research indicates that school climate can either be a positive influence on students' learning environment, or can serve as a significant barrier to students' learning. Researchers have documented that positive ratings of student climate to contribute to factors that help high economically disadvantaged schools "beat the odds" (Voight, Austin & Hanson, 2013). Indeed, students at high-performing AISD schools with high levels of economic disadvantage had more positive ratings of behavioral environment and adult fairness and respect in Spring 2013 than did students at lower performing schools AISD with similar levels of economic disadvantage (Lamb, 2014).

The following tables show the total number of surveys students at Brentwood completed in 2013-2014 (Table 1) and the response rate by grade (Table 2).

# of surveys returned	169	16,960
# of students	209	19,770
% of students represented	81%	86%

grade	# of students enrolled	# of responses	response rate
3rd grade	84	73	87%
4th grade	76	53	70%
5th grade	49	38	78%
6th grade	n/a	1	n/a%

Students' grade level was self-reported. Population data reflect enrollment as of the PEIMS snapshot date in October 2012.

Figure 1. Student Climate Survey Subscales for Brentwood and all Elementary Schools, 2013-2014

Brentwood's highest score on the 2013-2014 Student Climate Survey was for teacher expectations, which measures students' perceptions of their teachers' expectations. Please think about what your campus does to foster high expectations, and share your strategies with others.

Brentwood's lowest score on the 2013-2014 Student Climate Survey was for student engagement. This subscale measures the extent to which students enjoy their schoolwork and learning. We encourage your campus to improve the ways in which teachers provide instruction
