

Research indicates that school climate can either be a positive influence on students' learning environment, or can serve as a significant barrier to students' learning. Researchers have documented that positive ratings of student climate to contribute to factors that help high economically disadvantaged schools "beat the odds" (Voight, Austin & Hanson, 2013). Indeed, students at high-performing AISD schools with high levels of economic disadvantage had more positive ratings of behavioral environment and adult fairness and respect in Spring 2013 than did students at lower performing schools AISD with similar levels of economic disadvantage (Lamb, 2014).

The following tables show the total number of surveys students at Bryker Woods completed in 2013-2014 (Table 1) and the response rate by grade (Table 2).

Table 1: Survey Summary		
# of surveys returned	199	16,960
# of students	207	19,770
% of students represented	96%	86%

Table 2: Response Rate by Grade			
grade	# of students enrolled	# of responses	response rate
3rd grade	55	50	91%
4th grade	54	52	96%
5th grade	77	72	94%
6th grade	21	21	100%

Students' grade level was self-reported. Population data reflect enrollment as of the PEIMS snapshot date in October 2012.

Figure 1 depicts Bryker Woods's average student climate survey ratings for 2013-2014, compared with average ratings across all Elementary Schools in 2013-2014. Scores over 3.0 are desirable, as indicated by the green line. Please note the green and red text boxes that highlight the specific area in which Bryker Woods most excels, as well as the area in which Bryker Woods can improve most.

Figure 1. Student Climate Survey Subscales for Bryker Woods and all Elementary Schools, 2013-2014

Bryker Woods's highest score on the 2013-2014 Student Climate Survey was for teacher expectations, which measures students' perceptions of their teachers' expectations. Please think about what your campus does to foster high expectations, and share your strategies with others.

Bryker Woods's lowest score on the 2013-2014 Student Climate Survey was for student engagement. This subscale measures the extent to which students enjoy their schoolwork and learning. We encourage your campus to improve the ways in which teachers provide instruction that is relevant and engaging for students. Improving student engagement is a goal of Social Emotional Learning (SEL). To find out ways to improve student engagement, please visit: <http://www.austinisd.org/academics/sel>

The following pages contain more detailed information regarding Bryker Woods's student climate results from 2011-2012 to 2013-2014. Please review the individual items on each subscale with particular attention to how Bryker Woods's average ratings have changed or remained consistent over time. Please note that some subscales have changed from previous years, making longitudinal comparisons inappropriate for some items and subscales. For items and subscales where longitudinal data are available, statistically meaningful changes are noted with up or down arrows. Please share the results of this report with all campus staff and your Campus Advisory Council.
