

2009-2010 AISD Campus Staff Climate Survey

A healthy school climate is characterized by positive relationships among students, all

In Fall 2009, 77% of teachers from Gorzycki responded to the survey. Figure 3 represents the percentage of respondents at Gorzycki (depicted in dark green) and across all Middle Schools (light blue) who identified themselves as teachers, classified/support staff, or administrators and non-teaching professionals, plus the number who did not specify a staff role. This information will help you to generalize the findings to the rest of your campus community.

Staff results for Gorzycki for the 2009-10 school year year are highlighted on the next page. Please pay close attention to the call-out boxes that appear in red and green as they highlight specific campus climate areas that Gorzycki can improve, as well as areas in which Gorzycki excels. You may visit the following websites for resources and tips on how to improve campus climate in general, and specific resources for improving the area of Gorzycki's lowest subscale score are provided on the next page.

The appendix provides you with more detailed information regarding Gorzycki's campus climate from 2007-08 through 2009-10. Please review the individual items on each subscale with particular attention to how Gorzycki's average ratings have changed or remained consistent over time. To indicate which changes are most meaningful from year to year, statistically meaningful changes are flagged with up or down arrows. Please share the results of this report with all campus staff and your Campus Advisory Council to inform campus improvement planning.

The graphs below depict Gorzycki's staff climate ratings over time, as well staff climate ratings across all Middle Schools in 2009-10. Scores over 3.0 are desirable, as indicated by the red dashed line in the graphs below. The first step in improving campus climate is to examine the score for each area (Figure 2).

For 2009-10, Gorzycki staff rated **Collegial Leadership** the highest of all climate areas. Alternatively, Gorzycki staff rated **Data Vision** the lowest of all climate areas. In the appendix, you will find the individual items that make up **Collegial Leadership** and **Data Vision**. Examine these items and consider possible areas for campus improvement. Make note of any item with an arrow, which indicates an average rating that is meaningfully higher or lower than that of the previous year. Discuss these areas of strength and challenge with staff, and note the ways in which initiatives on campus have addressed or could address these issues during the current or next school year.

Gorzycki's lowest score on the 2009-10 staff climate survey was Data Vision, which measures the extent to which teachers utilize data in their work. Data Vision has been reported to contribute to positive academic achievement. For tips on ways to improve data use on your campus, please visit:
