

McCallum High School

2014-2015 AISD Student Climate Survey

Research indicates that school climate can either be a positive influence on students' learning environment or can serve as a significant barrier to students' learning. Researchers have documented that positive ratings of student climate to contribute to factors that help high economically disadvantaged schools "beat the odds" (Voight, Austin & Hanson, 2013). Indeed, students at high-performing AISD schools with high levels of economic disadvantage had more positive ratings of behavioral environment and adult fairness and respect in Spring 2013 than did students at lower performing schools AISD with similar levels of economic disadvantage (Lamb, 2014).

The following tables show the total number of surveys students at McCallum completed in 2014-2015 (Table 1) and the response rate by grade (Table 2).

The following pages contain more detailed information regarding McCallum's student climate results from 2012-2013 to 2014-2015. Please review the individual items with particular attention to how McCallum's percentage of students providing favorable responses has changed or remained consistent over time. For items where longitudinal data are available, statistically meaningful changes are noted with up or down arrows. Please share the results of this report with all campus staff and your Campus Advisory Council to inform campus improvement planning.

Behavioral environment	McCallum			All High Schools
	2012-2013	2013-2014	2014-2015	2014-2015
1. My classmates show respect to each other.	82%	87%	87%	86%
2. My classmates show respect to other students who are different.	77%	81%	84%	83%
