2013-2014 AISD Student Climate Survey Travis High School

Research indicates that school climate can either be a positive influence on students' learning environment, or can serve as a significant barrier to students' learning. Researchers have documented that positive ratings of student climate contribute to factors that help high economically disadvantaged schools "beat the odds" (Voight, Austin & Hanson, 2013). Indeed, students at high-performing AISD schools with high levels of economic disadvantage had more positive ratings of behavioral environment and adult fairness and respect in Spring 2013 than did students at lower performing AISD schools with similar levels of economic disadvantage (Lamb, 2014). The following tables show the total number of surveys students at Travis completed in 2013-2014 (Table 1), the response rate by grade (Table 2), and the distribution of responses by race/ethnicity compared with the population (Table 3) for students at Travis.

Table 1. Number of Respondents in 2013-2014 for: All Travis High Schools

of surveys returned

of students

% of students represented

Table 2. Response Rate by Grade for Travis, 2013-2014

grade

9th grade

10th grade

11th grade

Population data reflect enrollment as of the PEIMS snapshot date in October 2013 whereas students' grade level and ethnicity were self-reported on the survey. The "ethnicity/race" designations allow students to first choose their ethnicity (Hispanic/Latino or non-Hispanic/Latino) and then choose one or more of five race values.

Table 3. Distribution of Responses by Ethnicity/race for Travis Relative to Travis's School Population, 2013-2014

Ethnicity

Hispanic/Latino
