

AISD Student Climate Survey: Results for Spring 2013 Through 2016

TRAVIS

Evidence indicates that positive school climate fosters a positive learning environment for students. Also, researchers have documented that a positive school climate helps students from economically disadvantaged schools to beat the odds (Voight, Austin, & Hanson, 2013). This report displays school climate ratings for the past four years, along with the 2016 ratings for all AISD schools at this level. New items were added in 2016 to assess students' social and emotional (SEL) skills.

Survey Results

For each item in this report, the number displayed represents the percentage of students who agreed the statement is true a lot of the time or sometimes. Arrows indicate statistically meaningful changes from one year to the next. Items marked with * were not asked that year. To access reports from previous years, please visit the Department of Research and Evaluation's (DRE) website.

This section of the report describes students' responses to 2016 survey items based on their self-reported ethnicity and gender. The table below provides the number of students who responded to the survey from each student group. Blank cells indicate when the number of students responding was less than 10.

My classmates show respect to each other.

My classmates show respect to other students who are different.

I am happy with the way my classmates treat me.

Students at my school follow the school rules.
